

# Unforgettable Moments

with perfect glasses ■■ Lunasol

## Countless possibilities with glasses **■ ■ Lunasol**

Lunasol glasses are made from the crystal glass META Glass® and they represent a combination of traditional glassmaking craftsmanship and creative design.

This is particularly evident within the first 3 glasses collections, which are hand-crafted. Nevertheless, as you can easily see, our other 11 machine-made collections are not lagging behind.

At the end of this brochure, you will find a variety of starter sets as the ideal basic household equipment.

The wide range of shapes and types of glasses make these products ideal guides for all beverage service needs.

# Green Wave

- Blown -

Mouth-blown glasses, developed in collaboration with top sommeliers. Each one of the four products is designed precisely for needs of wine.

## Unleash the wave of experiences

Green Wave glasses have a made-to-measure chalice shape for the best possible gourmet drinking experience. The unique chalice base ensures premium oxygenation and release of all the wine flavour components and aromas. When the glass is slightly tilted, wine flows in a perfect wave, just like water in the sea.

### Universal Glas White Wine glass

Reveals the ideal fullness and intensity of aromas

Excellent flowability

Universal glass shape  
- also suitable for lighter red wines

### Bordeaux Red Wine Glass

Optimal for full-flavoured wines

Excellent glass

For heavy wines  
- perfect release of aromas

Excellent flowability for wines with higher alcohol content

Leaves beautiful wine legs on the walls.

### New World Red Wine Glass

The chalice shape allows a quick release of aromatic substances

Sparkling wine bubbles are concentrated in the centre of the chalice.

Excellent flowability on the walls

### Sparkle Champagne Glass

Ideal chalice for perfect flavour enhancement

Sparkling wine bubbles are concentrated in the centre of the chalice.

Excellent flowability along the walls of the glass.

# Flow

- Blown -

Handmade glasses according to an old tradition.  
Shaped by glassmakers with know-how passed down  
from generation to generation.

## Handcrafted fantasy

Hot glass is magical. Liquid like honey.  
The glassmaker has only a few seconds to shape it.

That's why they first scoops the glass mass onto a glass  
pipe and blows the unique shape of the chalice by making  
circular movements. Each movement is unique  
and resembles a dance. The result is a perfect work  
of human hands - a unique glass on a stem Flow.

## 21<sup>st</sup> Century

Hand-painted glasses in gold and platinum colours will become the jewel of your table setting. They look luxurious and exclusive, even though their design is soft. Both alcoholic and non-alcoholic beverages will stand out in them. They are ideal for festive occasions.

# ☐☐ Lunasol glasses

Made in a glasswork dating back to 1892.  
Marked by tradition, years of experience and passion for the craft.  
They will delight gastronomes and every connoisseur.

## *Perfect machine production*

All glasses are produced by using a traditional two-stage production process.  
First, the cup is blown and then the stem is heated and glued on.

The only exception is the 21st Century and Century collection,  
made with the ground-breaking "drawn stem" technology.  
During this production process, the entire glass mass  
is poured into a mould, from which an all-glass product is formed.  
The advantage of this technology is the higher strength of the product.

All glasses are unlabelled as standard. The  
stated volume is measured to the rim.

# META Glass®

All Lunasol glasses are made of META Glass® crystal glass. META Glass® is a registered trademark of **Sola** Switzerland

## Unrivalled features

The high-quality crystal glass is made without lead. It is a mixture of precious metal oxides with beautiful colours and spectacular sound.

During production, high ecological standards are maintained, which protects our environment and thus the human being.  
For this reason, the glass does not contain any lead.

At the same time, the quality of produced glasses is particularly high. The glasses remain spotlessly clean even after 1,500 dishwasher cycles.

The rim of the glass is handled by laser, which makes the rim stronger, thus improving its excellent features for using in the catering industry.

# 21<sup>st</sup> Century

Diamond shape, elegant modern design – these features characterize the 21st Century glasses. Thanks to the high-quality production process and carefully designed geometric shape of the chalice, they have exceptionally thin walls that retain their strength.
