Unforgettable Moments

with perfect glasses Lunasol

Countless possibilities with glasses Lunasol

Lunasol glasses are made from the crystal glass META Glass® and they represent a combination of traditional glassmaking craftsmanship and creative design. This is particularly evident within the first 3 glasses collections, which are hand-crafted. Nevertheless, as you can easily see, our other 11 machine-made collections are not lagging behind.

At the end of this brochure, you will find a variety of starter sets as the ideal basic household equipment.

The wide range of shapes and types of glasses make these products ideal guides for all beverage service needs.

Green Wave

- Blown -

Mouth-blown glasses, developed in collaboration
with top sommeliers. Each one of the four products
is designed precisely for needs of wine.

Unleash the wave of experiences

Green Wave glasses have a made-to-measure chalice shape for the best possible gourmet drinking experience.
The unique chalice base ensures premium oxygenation and release of all the wine flavour components and aromas.
When the glass is slightly tilted, wine flows in a perfect wave, just like water in the sea.

Universal
White Wine glass

Universal glass shape
also suitable for lighter red wines.

Syrah / Cabernet / Merlot
Red Wine Glass

The glass shape allows a quick
release of aromatic substances.

Pinot Noir
Red Wine Glass

Excellent fluidity along the walls of the glass
even for wines with higher alcohol content.

Champagne
Champagne Glass

Sparkling wine bubbles are concentrated
in the centre of the chalice.

Flow

- Blown -

Handmade glasses according to an old tradition.
Shaped by glassmakers with know-how passed down
from generation to generation.

Handcrafted fantasy

Hot glass is magical. Liquid like honey.
The glassmaker has only a few seconds to shape it.

That's why they first scoops the glass mass onto a glass pipe and blows the unique shape of the chalice by making circular movements. Each movement is unique and resembles a dance. The result is a perfect work of human hands - a unique glass on a stem Flow.

Lunasol glasses

Made in a glasswork dating back to 1892.
Marked by tradition, years of experience and passion for the craft.
They will delight gastronomes and every connoisseur.

Perfect machine production

All glasses are produced by using a traditional two-stage production process.
First, the cup is blown and then the stem is heated and glued on.

The only exception is the 21st Century and Century collection,
made with the ground-breaking “drawn stem" technology.
During this production process, the entire glass mass
is poured into a mould, from which an all-glass product is formed.
The advantage of this technology is the higher strength of the product.

All glasses are unlabelled as standard. The stated volume is measured to the rim.

META Glass®

All Lunasol glasses are made of META Glass® crystal glass. META Glass® is a registered trademark of Sola Switzerland

Unrivalled features

The high-quality crystal glass is made without lead. It is a mixture of precious metal oxides with beautiful colours and spectacular sound.

During production, high ecological standards are maintained, which protects our environment and thus the human being. For this reason, the glass does not contain any lead.

At the same time, the quality of produced glasses is particularly high. The glasses remain spotlessly clean even after 1,500 dishwasher cycles.

The rim of the glass is handled by laser, which makes the rim stronger, thus improving its excellent features for using in the catering industry.

Lead-free
Intense wine bouquet

21st Century

Diamond shape, elegant modern design – these features characterize the 21st Century glasses. Thanks to the high-quality production process and carefully designed geometric shape of the chalice, they have exceptionally thin walls that retain their strength.
